

Task Management:

You are hereby to create an application that includes the following features:

Restful APIs

1. Add Task, A task has following attributes
 - Name
 - Description
 - Priority
 - Assignee
 - Reporter
 - Estimated Time
 - Attendees (List of Email Address)
2. Delete Task
3. Assign task to a particular user or Assignee
4. Update Task Description
5. Get All Tasks

Dashboard:

Create a bar chart graph that shows number of tasks assigned to a set of users.

UI:

Create a screen that has two option.

- Select a user
- Upload a document
- The upload should show progress and upload speed.
- Provide a list of uploaded files and a download button
